

FOR HEALTHY PLANTS

BROTOMAX®

WHAT IS BROTOMAX?

A blend of selected nutrients and plant extracts that stimulates increased production of polyphenols improving plant vascular health.

WHAT ARE POLYPHENOLS?

A family of natural, plant defense and anti-oxidant compounds present in all plants.

WHAT DO POLYPHENOLS DO?

1. Fortify Vascular Walls.
2. Stops vascular plugging.
3. Creates an unfavorable environment for pathogen growth.

UNDER WHAT CONDITIONS SHOULD I USE BROTOMAX?

Brotomax works best to improve the health of crops experiencing symptoms of vascular diseases such as but not limited to: Eutypa (dead arm), Asca (measles), phytophthora, pythium, young vine decline, verticillium, Pierce's disease, etc.
